Abdelrahman El-Sherif

AI Engineer · Agents, LLM Applications & Data Pipelines

Alexandria, Egypt · +20 120 760 5310 · abdelrahmanemad2530@gmail.com
linkedin.com/in/abdelrahmanelsheriff · github.com/AbdelrahmanEmad253

Summary

AI engineer who builds tool-using agents and the data layers behind them, with a business-strategy background that keeps the work tied to real operations. Co-builds production HR and marketing agents for the Saudi market, solely owns one agent's multi-source data pipeline, led a 4-person team shipping an AI adaptive-learning platform, and teaches data and AI engineering to working professionals.

Experience

Cycls Remote (KSA)
AI Applied Engineer Intern *Jul 2026 – Present*

- Co-build (and wrote most of) a Saudi-market HR agent spanning hiring to offboarding: a large departmental tool catalog, human approval before any email or spend, and statutory rules in a verified config layer, not code.
- Co-build an AI marketing agent for MENA businesses that researches markets, plans campaigns and publishes approval-bound content.
- Solely built its data pipeline: resumable, rate-limited collectors pulling government datasets, tenders, news, trends and POIs into a multi-million-row Parquet/DuckDB store, with cross-source validation, pytest coverage and LLM-audited code reviews.

BB Strategy Remote (KSA)
Business Growth Strategist (Co-founder) *May 2025 – Present*

- Deliver strategy and growth engagements for all BB clients: discovery, strategic plans, OKRs, and ROI/pricing models built on a 15+ competitor analysis of the KSA IT sector.
- Built a CRM pipeline from scratch (Odoo, Mailchimp) with automation and quotation flows, and ran ISO gap and cycle-time bottleneck audits.

Arabian Academy Alexandria, Egypt
Data & AI Instructor *Feb 2026 – Present*

- Teach Data Analysis, Data Science and AI Engineering tracks to 60+ working professionals, with hands-on modules on real 100K–1.1M-row datasets and capstones run as Scrum sprints.

Mentorness · PlacementDost · CodeAlpha Remote
AI & Data Science Intern *Apr 2024 – Aug 2024*

- Trained a TensorFlow CNN on 100K+ leaf images across 38 classes (94.6% validation accuracy). Also built scikit-learn models for crypto-trend and Parkinson's classification, and feature-engineering pipelines.

Projects

LearNova – AI Adaptive Learning Platform | *Flutter, FastAPI, Supabase, LLM APIs* Jun 2025 – Jun 2026

- Team Lead & Scrum Master (4 people). Owned the data engineering, database design (RLS, server-side scoring), all documentation and the thesis.
- Built the psychometric compatibility engine that routes learners to a track, the AI mentor's sentiment/cognitive-load burnout flags, LLM admin insights, and a 351-respondent market study. github.com/AbdelrahmanEmad253/LearNova

Technical Skills

AI & LLMs: Tool-calling agents, RAG, embeddings & vector search, prompt engineering, human-in-the-loop, Claude/Gemini APIs
Data: Python, SQL, Pandas, DuckDB, Parquet, web scraping, PostgreSQL, Supabase, SQL Server
ML: scikit-learn, PyTorch, TensorFlow/Keras, CNN/RNN/LSTM, NLP (spaCy, NLTK, TF-IDF, sentiment analysis)
Engineering: FastAPI, Docker, Git, pytest, uv · **BI**: Power BI, Tableau, Excel
Business: Market research, pricing & ROI modeling, OKRs, CRM design, Scrum

Education & Certifications

B.Sc., Faculty of Science (SIM Program) | Alexandria University Alexandria, Egypt
Power BI Specialist (Skill Dynamix) · IBM Data Analyst L1 & L2 · NTI Data Analysis · CCAI Summer School
